INNOVATION

PAVE THE DIGITAL CURRENCY WAY

LIMITS ONLY BY THE IMAGINATION

WILL SET US FREE

Foreword from the CEO

This vision began over 25 years ago, more organized around 13 years ago, a possible reality 18 months ago and,, now is being executed at a strategically picked date/time in less than 2 weeks. The motive to turn a hope, a dream, a fantasy into reality was simple once becoming responsible for another life other than my own. Each moment as a parent was a growing catalyst to ignite the necessary determination and ambition to turn the intangible tangible. Unbeknownst at the time was that 1 month before finding out my life would change forever, the means to making the new life I would be responsible for change forever, was born. Even though the sense of urgency was in its infancy and the grander scheme wasn't completely revealed yet that February back in 2009, it was already heading in this direction.

Fast forward to 2020 where things seemed to start falling apart. More specifically, to the ninety-nine percent of us on the bottom of the global money/power hierarchy. Governments weakening nearly every positive position for the 99 when pandemic (1) protocols took them out of work (2) physical effects overwhelmed the aging and cardiovascular/respiratory stricken and (3) placed the rest at the front lines to help but equipped them inappropriately and ineffectively. Through the imposed struggle, everything became increasingly clear. The answers as much as the issues. The time frame as much as the time needed.

2022 is replicating the economical equivalent of that year's biological one. With the next generation only a few years from fully inheriting the many generations of mistakes and complacency that predates them, the sense of urgency is now in 4-alarm mode.

THE WORLD HAS BECOME A PLACE NEARLY UNLIVABLE BY ANY STANDARDS WE USED TO HAVE.

It is only getting worse - almost daily - with each passing hour.

Talks of food shortages. Talks of energy shortages. Talks of a Global Depression.

All current global events are historically proven as pre-requisites to much greater catastrophes. There seems no denying what is coming. The only debatable aspect being just how fast and how far the fall will be.

Every civilized and industrialized nation is either being broken down or is already broken and not recovering.

Russian/Ukrainian conflict and the stranglehold on Natural Gas - The ongoing the economic deconstruction of China from their property collapse and ongoing inflation concerns - The UK suffering through a 14-year inflation high coupled by energy costs and worker shortages - India being economically sound as they pull ahead of the UK in GDP but to do so they sacrifice health care, sanitation, proper education and ethical business dealings.

In the worst position and declining faster and more profoundly is the US. The US, having a sustained cost of living increase that hasn't been felt in around 40 years with food prices up 13.5% (1979), rent price increases 6.7% (1986), electric cost up 15.8% (1981) and the cost of medical coverage up 24.3% (highest ever). Outside of the economy issues like lessening punishment for crimes committed and even decriminalizing non-petty crimes to all-time highs of deaths and cost related to drug overdose at 300+/day with an annual price tag of \$1.3+ trillion. Even on top of that is a country divided by race, beliefs, political affiliation, and sexual orientation/preference.

THE THRESHOLD FOR NEEDED CHANGE HAS BEEN EXCEEDED. ACTIONS - THE ONLY OPTION. NOW - THE ONLY ACCEPTABLE START TIME.

Like a hurricane heading towards land, the recession impacts seemed, at best, a tropical storm in Q1, a category 1 in Q2, but pushing a category 5 heading into Q4...gaining momentum every day and becoming more of a certainty as it begins filling the horizon. Once it arrives, it will shape the landscape of everything it touches and most likely, not for the better.

The plan seemed almost destined to come to fruition given all the pieces that are necessary to cause real, positive change. As change, innovation, growth and evolution, for that matter, come from the most negative of environmental, situational and life experiences, the timing of everything was imperative. Taking advantage of a desperate situation seems less than moral or ethical, but it truly is the only time when people are more apt to try something new and finding unity through their newfound openness.

ENTER STAGE RIGHT - DIGITAL ASSET INVESTING BEYOND THE PERCEIVED VALUE OR POTENTIAL FUTURE VALUE - INTRODUCING SAFE INVANTAGE

*The
"SAFE"
Story*

From an introduction to buying a crypto to releasing one. An 18-month journey.

Cryptocurrency is a very volatile and unpredictable investment space. To truly understand it in all its "glory", it is necessary to have money you can lose navigating how to buy, what to buy, how much and with what digital currency. In many cases, even getting to a point to buy the digital currency that you want to use to acquire the one you want can be an obstacle all in itself. Or understanding that the latter is a necessary step for any decentralized crypto purchase. After 12-months of learning the ins and outs of cryptocurrency, it was clear there was a major issue in finding sustained investment success. But it was also clear what the solution would be.

The solution was not within the crypto-space but the finance world outside of it. With over 1 billion people worldwide who weren't investing in the unstable, unregulated, and decentralized arena were avoiding it for reasons that came down to just a handful of very fixable problems. The only thing was, to fix the problems, it couldn't be done without introducing a new cryptocurrency. It couldn't be done without creating a registered and licensed business before it could be released. And none of that would be possible without analyzing every aspect of crypto from Bitcoin to Alternative Tokens to the communities and social media/influencers that support them.

FAST FORWARD >>>>

from APR '21 to JAN '22

— 5,000 MAN HOURS — 1,000+ COMMUNITIES — 1,000+ CRYPTO INVESTMENTS —

Strategic Analytics and Financial Endeavor Holdings was born. An investment management/holding company came to be from taking pages out of the Google and Amazon playbooks. To have an umbrella to protect those involved plus have a single, majority asset holder handle things from a financial standpoint. This would also allow that every investment SAFE Holdings made wouldn't be limited to any one business sector or industry. Such as SAFE Invantage. A Limited Liability Company built to develop digital assets and broker external investments into those assets. Then companies such as Real Reinvented Estate and Foundation Future Rebuild that would be funded and directly add real world value to the digital assets that SAFE Invantage would release. With another 3-4 businesses ready to incorporate this November, everything was coming together and taking shape. Individual company focus as diverse as innovative engineering, software/game development, and small business point of sale upgrades. Each one designed to address the problem of perceived value in cryptocurrency through nearly 100 company coined "Invest Case Utilities". All that means is that a demand is created for the digital assets in the real world and then that demand is met through investing into the token/coin without immediately selling it. This way, everyone involved gets to enjoy the benefit of investing and not just the executives.

THERE IS NO PLACE FOR GREED OR SELFISH/SELF-SERVING INTENTIONS AMONGST THE ENTIRE EXECUTIVE TEAM

Utilizing innovation to stay ahead of the competition but, more importantly, deliver products and services as solutions to long overdue socio-economic issues. To bridge the gap between the 1% and the 99%. While not losing site of one of the main driving forces for all of this, giving back and helping rebuild a future that, right now, doesn't appear to be heading in the right direction. Here and all over the world. One small step will be our Foundation Future Rebuild. A non-profit using company profits and token/coin investments to release a grant program for everything from today's Youth (infancy to teenager) to Veterans/Veteran's families to those families who lost a loved one due to inexplicable violence. Another small step is building these companies with employees who will always know their value, who's benefits will be 100% paid, and where a career will actually make a difference. A work environment where working to make ends meet is checked at the door in favor of participating because it gives you purpose and you love what you do.

Every idea, every construct, and every aspect is built off pre-existing flaws in everything we touch. The problems with investing in crypto, the problems with working for corporate America, and the problems that go overlooked around the globe that should be addressed first.

WHERE INVESTING GIVES WAY TO INNOVATION...

INNOVATION GIVES WAY TO SAFE INVESTING...

WHICH GIVES WAY TO GREATER INNOVATION...

*an Executive Summary**Phase 1 thru 4*

a high-level overview of the 10-Phase Strategic Analytics & Financial Endeavor Holdings Roll-Out

“THE FULL SPECTRUM CURRENCY CONSOLIDATION SOCIO-ECONOMIC BRIDGE”

Investment Opportunity

From **Research** to **Concept** to **Plan** to **Implementation** to **Evolution**

[APR 2021] – The Science of Business: Solving the Cryptocurrency 99% Failure Rate – [DEC 2021]

Problem Identification – Root Cause Analysis + Testable Hypothesis of 5 Main Causes (*min of 1,100 projects*)

PHASE-1-ONE Introduction to Digital Asset Translation to Real World ROI (return on investment) [Q1-Q4 2022]

A | Max ROI (mxR) Development, Evolution, Release and Investor Safeguard exposed/addressed – a Safeguard meant to keep investors from hurting their positions and selling before they get more than just 3x their investment is exposed through a lengthy wallet hopping process. Upon seeing this, eventually released the Safeguard so they could make a few dollars instead of a few hundred thousand dollars. All to sell early while getting taxed more.

B | Massive multi-platform marketing to promote Max ROI, Moon ROI and to highlight everything being worked on. This will include the final VC investment (<=\$800,000) round before financial self-sufficiency is realized.

NOTE: To avoid pump and dump implications, any additional malicious or nefarious attacks, no specific dates being released until each deliverable has been tested thoroughly, internally QAQC'd, and fully audited by a reputable 3rd party first. No exceptions.

PHASE-2-TWO Invest Case Implementation, Innovation, and Tokenization [Q4-Q1 2023]

A | **Invest Case Performance Utilities** © Unleashed starting with Moon ROI (4% Max ROI [1] Rewards, 4% Moon ROI Reflections, 4% Fiat) and Payroll (Main team hired on – [2] Bonuses, [3] 401k w/employer match and [4] 20% of base salary offered up in mxR)

B | **THEFREEDOMCHAIN** Blockchain Unveiled with The Freedom Chain Centralized Coin (\$TFC) and Independently Owned Currency (\$IOC) Stable Coin [being released liquidity backed 1:1 (10M Minted 1st Run)]

C | **The Brother's ROI – Adventures IN Cryptocurrency** © (playable alpha 1 level + 40 days to playable beta 4 levels – 15 days to QA and release of 5 level game on Android, iOS, Win and via Web3 [Introduction of coined term **Invest-2-Advance** © for in game purchases using a credit card – all purchases are investments, net gain the more you spend, parents/of age players will not only get better game play the more they spend but will receive [5] 50% mxR/[6] 50% mnR per purchase to use in game – that goes directly to the Reinvest wallet for mxR and the Reflection Wallet for mnR]

PHASE-3-THREE “The Helping Hand Initiative” Round 1 Released [Q1-Q2 2023]

A | **Foundation Future Rebuild** © Not-For-Profit Launch with Introductory Proclamation Guidelines (grant application process fully funded by cryptocurrency profits and a healthy investment position). With the business launch comes a token in the same name. Although the token won't be direct shares of the foundation, it will be used to build a more synergistic ecosystem. The Foundation Future Rebuild {ffR} token will have native coin and native stable coin pairs followed by USDT (ERC/TRC/BEP-20), USDC and BUSD. Will feature 4% native coin, [7] 4% mxR and [8] 4% mnR rewards for every transaction (buy, transfer, sell)

NOTE: the Max/Moon ROI rewards will be in the upgraded release of each coin that comes pegged to our native token. The timing will be negligible between ffR and Max and Moon ROI Level Next Upgrade

B | **Real Reinvented Estate** © Grand Opening. Even though the real estate market drop off wasn't nearly as bad as that in 2007-2009, so far, this one came as a surprise to many this past summer. Enjoying elevated economic times, house costs toppling 30-40% more than actual value, and a society not looking at the perfect recession storm brewing as retail started

slipping and GDP projections were in a downward trend. With hundreds of thousands defaulting on their mortgages due to inflation and the Federal Interest Rate both lacking a foreseeable ceiling, now occurring in parallel with a dwindling job market, it's become a landlord favorable renter's market. Meaning, people are almost forced into signing overpriced leases they can't afford because of houses they can't unload. The purpose of RRE is to lessen rental/lease costs through **Invest-2-Rent**©, **Invest-Rent-2-Own**© and **Invest-2-Own**© options on houses we buy (100 between Feb 1st and Jun 1st 2023) at 60-70% less than market value, reinvest into them through converting single family homes into 2-3 family homes, and allowing the [9]deposit and even partial [10]rent each month to be paid in anyone of our tokens (Invest-2-Rent). As the trade volume increases, the token supply decreases, the token value increases thus lowering the value of their rental commitment and giving them a new savings account. Following the recession plateau and eventual recovery in 18-24 months, each unit will be available to buy (Invest-2-Own).

C Max ROI and Moon ROI move to **THEFREEDOMCHAIN** with massive re-release and million dollar 10-day marketing plan which includes all 5 tokens. Re-release will readjust price points, total supply and liquidity that will benefit all holders of both coins an immediate 5-7x current portfolio value. Max ROI will be released having the same 8% tax but it'll be broken into 2% reflections, 2% mnR rewards, 2% native coin rewards and 2% fIR - every transaction (buy/sell/transfer) with a trade limit of 2%. Moon ROI will be similar but 3% of each per transaction.

NOTE: All transaction penalties for selling will be removed on an account by account basis and the holder notified 72 hours in advance. Will depend on length and percent held. 80% or more held for longer than 60 days from purchase will be eligible.

D To offset the disparity between big business and small business caused by the inflation hike, employment strain, interest rate climb and the supply chain delayed response to increases and decreases in demand (thus cost changes, supply excess or shortage, etc.), we will be implementing a brand new concept in retail through our level next POS (Point of Sale) System. One that looks and feels no different than any other one you'd typically see at one of your local small businesses, except, it takes pre-paid [11]**Invest-2-Shop**© cards. Like loading any other pre-paid card, turn Cash-Into-Crypto. The cards will have an online account you can setup and that becomes your crypto wallet. Equipped with charts, returns on each purchase (not just from value going up but from a [12]2% **Reinvest Rewards**© too) and a full itemized list of purchases (with savings, automatic earnings tax information with 2023 tax law QAQC to check against, price, etc.)

From the business owner perspective, through working direct with them and every supply chain stop right to the OEM for their inventory. When including [13]delivery expenses, [14]labor involved to unload and stock (staff), the entire process start to finish can be managed by the blockchain. By installing the POS, now recording every transaction without any external possibility for bad data or incorrect information, the money saved there would be enough. But now, the owner can lower the prices on every retail item (or service) to compete, if not undercut, their big business competitors. How, because including the Invest-2-Buy option means that as more purchases take place (which they will due to the unusual discount below even the most aggressive of retailer), the owner will watch their bottom line increase throughout the day. Extrapolate that internationally across 10's of thousands of small businesses and their 10's of thousands of supply chains...the trade volume increases exponentially. What may cost an investment of \$2 and \$2 in native currency, the owner's \$2 in Max ROI (for example) could be \$4 by days end or \$10 by week's end. Turns a higher profit with less inventory, less sales, and with lower prices. **The SAFE Economic Invtantage** ©

PHASE-4-FOUR Privately Held, 80% Liquidity Backed in Native Currency (\$IOC), Centralized Bank [Q2 2023]

Your Money – How You Want It – When You Want It – All External Fees [15]Reinvested Automatically

All Transactions Remain Your Transactions – Only You Have Control – Only You Have Say

Every Account Insured up to \$2,000,000 – Every Account Guaranteed SAFE

Minnow, Shark and Whale Sale
Buy Menu for NOV 6-11 ONLY

This is designed and dedicated to REAL investors looking for REAL passive income and REAL financial Freedom
 100% airdropped at time of receipt - the longer the tokens are held the higher RETURN ON INVESTMENT

How the process works:

Send BUSD BEP-20/USDT-BEP-20 or BNB-BEP-20 in one of the amounts listed to
 0xC2c943989040C945f37d1E65376A05aa355bb90c

And receive the total amounts stated below

I. MINNOW LEVEL:

$\$300 = 37,500,000 @ \$0.000008/mxR + 2,500,000mxR Bonus = 50,000,000 mxR$
\$485.50 total value

II. OVERSIZE MINNOW LEVEL:

$\$500 = 72,500,000 @ \$0.000007/mxR = 7,500,000mxR Bonus = 80,000,000 mxR$
\$776.85 total value

III. SHARK LEVEL:

(an additional \$500 in Moon ROI)

$\$1,000 = 165,500,000 @ \$0.0000006/mxR + 35,000,000mxR Bonus = 200,000,000 mxR$
\$2,500 total value

IV. GREAT WHITE SHARK LEVEL:

(an additional \$1,000 in Moon ROI)

$\$2,500 = 500,000,000 @ \$0.0000005/mxR + 100,000,000mxR Bonus = 600,000,000 mxR$
\$6,826.48 total value

V. BABY WHALE LEVEL:

(VIP + \$1000 in the 4 tokens that follow MNR/TFC/IOC/FFR)

$\$5,000 = 1,000,000,000 @ \$0.0000005/mxR$
\$13,710.81 total value

VI. BIG BLUE WHALE LEVEL:

(VIP + 0.5% share of SAFE Holdings + Board of Director Seat):

$\$10,000 = 2,000,000,000 @ \$0.0000005/mxR$
\$44,421.62 total value
